## PROFESSIONAL PURSUIT

Employ my analytical, communicative, and leadership skills to advance the state of machine learning at Domino's.

## EXPERIENCE

Ford Motor Company, Dearborn, MI

July 2017 - Present

- Machine Learning / Artificial Intelligence Scientist

- Utilized state of the art machine learning techniques in python, spark, and deep learning for applied research in financial lending, customer interaction, and computer vision
- Improved credit origination model performance by .03 AUC, saving an estimated four million dollars over a five-year time frame

John Deere Financial, Johnston, IA

- Data Science Intern

January 2017 – July 2017

- Performed complex SQL queries to gather multi-dimensional customer and commercial data for binary classification of default for over one million collections accounts
- Employed advanced machine learning algorithms such as logistic regression, SVM, and parallelized random forest within a Hadoop ecosystem, vastly reducing time required for model redevelopment
- Improved classification accuracy, AUC by .2, and improved collections effort prioritization

Vanderbilt University, Nashville, TN

- Computational Nanoscience Research Associate

Summer 2016

- Utilized computational approach with python, pandas, scipy, Fortran, and numpy to simulate femtosecond-scale high harmonic generation in Helium due to counter-rotating polarized laser fields
- Engaged in large scale data cleaning, Fourier transforms, linear algebra, and visualization with matplotlib

University of Maryland, College Park, MD

- National Science Foundation Fellow

Summer 2015

- Developed graphical user interface in MATLAB to optimize microbattery thin-film deposition
- Received award for “Best Oral Presentation” out of two dozen undergraduate researchers
- Research led to a formal presentation at the American Physical Society March Meeting

## EDUCATION

- Georgia Institute of Technology - Masters in Computer Science May 2019
- Central College - BA Physics & Economics, *Summa Cum Laude* May 2017
- Bangor University, Bangor, Wales, United Kingdom – Study Abroad Spring 2015

## SKILLS

- Python, R, Spark, SQL, AWS, Scala, Git, Hadoop, PyTorch, Tensorflow, Docker, SAS, H2O, Linux

## PROJECTS

- Facial detection and redaction for video startup built on AWS infrastructure
- Music genre recognition utilizing convolutional neural networks on six-second spectrograms
- Random Forest Model for binary classification of income using U.S. Census Data and scikit-learn
- S&P 500 historical investment outcome probability density analysis

## HONORS

- Vanderbilt University, University of Maryland National Science Foundation REU | Best Oral Presentation
- Outstanding Senior in Economics Award | Richard Mentink Award in Physics
